Homework

Create Student Login Form Using HTML and CSS

1. Add Background Cover to the web page
   - ★ *The background cover should be a fixed cover with no repeat.*

2. The Web page should contain a header as "Student Login Form"
   - ★ *For header add font-size,color,font-family, font-weight or font style*

3. Add Four Labels (Username, Password, Department, and Level) and add input fields for those labels.
   - ★ *For labels add font-size,color,font-family, font-weight or font style*
   - ★ *For input fields add width, margin, padding, display, border, and box-sizing.*

4. Apply two buttons(Login and Cancel buttons)
   - ★ *For buttons add background color, width, color, padding, margin, and border.*

5. Add the "Remember Me" Checkbox.

When you create the above login form, you can add CSS through inline CSS/internal CSS/External CSS. Besides above mention parts, you can add any other additional elements to your student login form to make it userfriendly.
